

State of Alaska – Office of the Governor — 34th Alaska State Legislature – Second Session
DEPARTMENT REVIEW – PASSED LEGISLATION

BLUE SHEET

Blue Sheets are a department's final bill analysis and provides the Commissioner an opportunity to weigh in on legislation that has passed, with a recommendation to the Governor on action that may be taken— to enact the bill, to veto the bill, or to allow the bill to become Law without signature (LWOS). Much of the information requested in the Blue Sheet can be taken from the department's bill analyses (BA), which were initially submitted at the time the bill was introduced and updated throughout the legislative process.

Blue sheets are due to the GLO three days after the enrolled bill appears on basis, or sooner by request.

Department: DOH

Date: 5/18/2026

Bill Number: HB27

Short Title (as it appears on BASIS): MAJOR MEDICAL EMERGENCY

What action do you recommend the Governor take?

Select one.

☒ SIGN ☐ VETO ☐ LWOS

Action Justification – Why do you recommend the above action?

Please be specific.

HB27 improves Alaska's emergency preparedness by strengthening the medical system's ability to respond to major emergencies like heart attacks and strokes, aligning EMS coordination, training, and facility standards with nationally recognized practices. It also introduces hands-only CPR education in public schools, ensuring students receive evidence-based instruction that increases community readiness and survival rates for cardiac events. Together, these provisions enhance public safety and support a more resilient statewide emergency response system.

What does this Bill do?

In addition to providing a succinct bill summary, please also consider the following: Why is this bill needed? How does it specifically change department programs? What is the anticipated impact on the public, the private sector? Does this bill align with the priorities of Governor Dunleavy?

This bill expands the department's authority under AS 18.08.010 to maintain a statewide, coordinated system of care not only for critically injured patients but also for "major emergencies," defined as heart attack and stroke. By classifying these conditions as major, time-critical medical emergencies, the department can apply the same trauma-system principles that have proven effective in improving outcomes—statewide data collection and analysis,

development and dissemination of standardized EMS and hospital care protocols, and coordinated patient routing to ensure timely, appropriate treatment. These system improvements are intended to increase survival and long-term quality of life for Alaskans experiencing a major medical emergency and to support efficient use of health care resources.

In addition, the bill strengthens community readiness by requiring the Department of Education and Early Development to adopt evidence-based, hands-only CPR curricula for public schools and ensure grade-appropriate instruction by qualified instructors. Providing students with practical, lifesaving CPR skills increases the likelihood of early intervention during cardiac emergencies, complementing the department’s broader system-of-care improvements and enhancing emergency response capacity statewide.

Detailed Sectional Analysis

The full sectional analysis of the bill should be completed by the lead agency. Other departments should include an analysis for sections of the bill affecting their agencies.

Sec. 1:

This section amends AS 14.30.360(a) to modify existing health education requirements in public schools. It removes outdated bracketed language and sets the stage for the addition of a new CPR education requirement by adjusting the structure of the health curriculum statute. This change supports integration of hands-only CPR instruction into the K–12 health education framework.

Sec. 2:

This section creates a new statute, AS 14.30.363, requiring the Department of Education and Early Development (DEED) to adopt evidence-based curricula to provide hands-only cardiopulmonary resuscitation (CPR) education to public school students. DEED must determine appropriate grade levels and ensure instruction is delivered by individuals with CPR instructor certification, EMS certification under AS 18.08.082, or a valid teacher certificate. Schools serving the identified grades must offer training when practicable. This section builds community capacity to respond early and effectively to cardiac emergencies.

Sec. 3:

This section amends AS 18.08.010 to add “care for major emergencies” to the elements of Alaska’s statewide emergency medical services (EMS) system. The change expands the department’s scope to include coordination, training, and facility-level system development for major medical emergencies—specifically heart attack and stroke—parallel to existing trauma system functions. Hospitals and clinics may voluntarily represent themselves as capable of treating major emergencies by meeting department-adopted criteria based on national standards.

Sec. 4:

This section amends AS 18.08.082(d), authorizing the Commissioner of Health to establish

designations in regulation for varying levels of care for major emergencies. This mirrors the state’s trauma center designation process and allows the department to recognize facilities based on their resources, staffing, and capabilities for treating major medical events such as heart attack and stroke.

Sec. 5:

This section amends AS 18.08.200 to add a definition of “major emergency,” specifying that it includes heart attack and stroke. This definition provides statutory clarity and ensures alignment across the EMS system improvements established in earlier sections.

Sec. 6:

This section provides an effective date of July 1, 2027, for Sections 1 and 2 (the school CPR education components).

Companion or Similar Bills

Please note companion legislation, the sponsor of the companion legislation, and identify any “rider” bills or provisions from other legislation that was included in this final bill. Please include the name of the sponsor of the “rider bill” or provision. If it was added as an amendment in a committee – please indicate the name of the legislator that sponsored the amendment.

SB 20 CPR curriculum by Senator Gray-Jackson was added as a Senate floor amendment. This a companion to HB 92 by Representative Ted Eischeid.

HB 27 was initially approved for introduction as Governor Dunleavy’s bill in 2020 but was not introduced due to a pivot into pandemic response. In 2023 this bill was approved to be shopped out as friendly – which is when Representative Mina first worked on drafting the bill for introduction.

Support/Opposition of the Bill

Please identify names, organizations, titles, and phones numbers of those who testified in support or in opposition of this bill.

Testimony or letters in support:

- Diane Lada MSN, ACNP, Senior Clinical and Program Manager, Providence Alaska Medical Center, 907-830-4149
- Lauren Harris BSN, Stroke Coordinator, Mat-Su Regional Medical Center, 907-861-6643
- Robert Lada MD, Medical Director of Neurosciences Providence Alaska Medical Center, Founding Member Alaska Stroke Coalition
- Rick Janik BSN, RN, CFRN, EMT, Airlift Northwest
- Lauren Simpson-Gomez, State Government Relations Director, American Heart

Bill Signing ceremony suggestions (if applicable)

Please provide information for consideration for a bill signing ceremony. Information that is helpful includes: a specific conference, event, venue, date, and the names and contact information of stakeholders who should be considered for an invitation to the bill signing ceremony.

Potential venue: Mat-Su Regional Medical Center

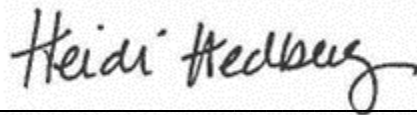

Contact: Amber Simonetti, Email: a.simonetti@msrmc.com

Office: 907-861-6618 Cell: 907-795-8507

Stakeholders:

- Alaska Stroke Coalition
- American Heart Association, Alaska
- Providence Alaska
- Alaska Native Tribal Health Consortium, Anchorage
- Alaska Regional Hospital, Anchorage
- Bristol Bay Area Health Corporation, Dillingham
- Central Peninsula Hospital, Soldotna
- Fairbanks Memorial Hospital, Fairbanks
- Mat-Su Regional Medical Center, Palmer
- Providence Alaska Medical Center, Anchorage

Commissioner's Signature: _____

Date: 5/18/2026

I have reviewed the above information and provided it to the Governor's Legislative Office for consideration of an action by the Governor on legislation passed during the second session of the 34th Alaska State Legislature.
